# The Radio

The way radios were used during the 20's was to broadcast images to the televisions of old. Nowadays we just use satellites in outer space. Families would gather Around their radios for night time entertainment, as more people owned radios the more radio stations were made.

# Telephone

During this time, the telephone rose from a nifty toy to an actual day to day tool that people used. The telephone is an incredible achievement in our planet's history. The candlestick phone was first introduced around 1892, and it continued until 1920. It was manufactured in the United States and was most often sold there as well.

# Silent movies

Silent movies were a type of film created in the 1920's involving a film in which no dialogue is spoken, rather using screens for text to exclaim for the character. Charlie Chaplin is well known as the most prevalent director in this era of film

# The Fridge

The fridge is an excellent step in humanity, allowing for a much longer lifespan for certain food items, and also gives the ability to chill others and keep your food fresh. The fridge was first introduced in the 1920s. In the 1920s and '30s, consumers were introduced to freezers when the first electric refrigerators with ice cube compartments came on the market.

# The washing machine

The history of the washing machine began in 1908 when the first washing machine was made. The first washing machine was called the Thor Washer and was made by the Hurley Machine Company of Chicago. The machine was designed to put clothes into the wooden drum, using a lever to start the machine. Developing into the 1920s washing machines became more advanced and common in an average house.

# Pop up toaster

The Toaster is an invention created in the 1920's which involved the process of toasting which did not require the watching of it in case of burning.
